

Xojiakbar Saydullayev

Frontend Developer — React

Angren, Uzbekistan xojiakbarsaydullaev13@gmail.com +998 95 313 71 13 github.com/xojiakbar3031 Telegram: @FEL1X333

// PROFILE

Frontend developer focused on building real, working products with HTML, CSS, JavaScript and React — not just mockups. I take projects from idea to a fully functioning, deployed application, including real API integrations, databases and admin dashboards. My work includes a live production site currently in use by a real client. Currently finishing a frontend development course and taking on new projects.

// SKILLS

Languages & frameworks

HTML5, CSS3, JavaScript (ES6+), React, Next.js

Design

Responsive design, Flexbox/Grid, UI animation

Office

MS Word, MS Excel

Backend & data

Node.js, Prisma ORM, SQLite, REST API integration

Tools

Git & GitHub, VS Code, VPS/Vercel deployment

Languages

Uzbek (native), Russian, *[English level]*

// PROJECTS

Angren City Technical College No. 4 — Official Site

Client project

Full-featured, trilingual (UZ/RU/EN) institutional website built with Next.js, Prisma and NextAuth. Includes an online admission system, a complete admin dashboard (programs, staff, news) and automated Telegram notifications. Currently running live on a VPS server.

angren-texnikum.uz

YouTube Clone

React

A functional YouTube-style interface with a real video player, comments, subscriptions and a like/dislike system, plus persisted watch history. Data layer built to be swapped for a real API with minimal changes.

[Demo](#) [Code](#)

StreamVibe

JavaScript

A streaming-platform interface pulling real movie data from an external API, with search, genre filtering and a fully responsive layout.

[Demo](#) [Code](#)

Pokemon Explorer & Animal Encyclopedia

API integration

Two interactive apps pulling live data and images from PokeAPI and the Wikipedia REST API, with search, filtering and sorting.
